

# 20/20 LEVA

NEW

20/20 collection

The lever-driven model from the 20/20 Collection comes in 1, 2, 3 and 4 group versions, with a steam cup heater as standard except in the 1 group version. The 2,3 and 4 group models feature a hot water wand and two steam wands, while the single-group model has one hot water wand and one steam wand. The water level in the boiler is regulated automatically, and an electronic alarm notifies the user when the water gets too low. All the main technical innovations featured in La San Marco's high-end lever-driven models are available optionally on this model: PID system, electric cup warmer, LED lighting for the worktop, and the new V LEVER. Featuring LEVA CLASS®, La San Marco's innovative patent that makes lever use during the mechanical extraction of espresso coffee safer, to meet the most exacting international standards.

STANDARD COLOURS

MODEL	N. GROUPS	BOILER (L)	DIMENSIONS (L x P x H mm)	POWER (w)		NET WEIGHT (kg)	PRICE
				Single ph.	Tri ph.
